Subject: RE: Request for CFAC data files

Hi Gunnar,

I received your email. Pleasure to meet you too.

Let me just check with John and CFAC and I'll get back to you. Thanks.

Subject: Request for CFAC data files

Hi Mike:

It was great to meet you, Drew, and Laura this week at the two public meetings. I greatly appreciate your assistance in helping me come up to speed on the RI/FS schedule and process. I also was impressed with your community outreach efforts.

One of the take home messages for me, was that this Phase I Site Characterization Data Summary Report is providing all of the nondestructive testing investigation, soil boring/well installation, and soils test pitting and analytical results, and that Rounds 2, 3, 4 will only be providing additional surface water and ground water sampling results. Which means this data set is the primary (not to dismiss future data) source to move forward to identifying data gaps for the Phase II Remedial Investigation Sampling and Analysis Plan (I know this was spelled out in the 11/15 RI/FS work plan, but bear with me as I am coming up to speed).

So, I am requesting some of your electronic data files that you generated in producing the Phase I DSR to help our EPA (and DEQ) team in reviewing this information to assess data adequacy and potentially identify data gaps. Specifically, we are requesting these files:

- GIS shapefiles – base map with wells, boreholes, and surface water sampling points
- Survey data - topo, wells, boreholes, and surface water sample locations
- Any electronic borehole data – EquiS, gINT, etc. (The borehole logs are tagged with filenames ending in *.GPJ indicating a gINT project database.)

We suggest that you set up a file share site for data transfer, but that's up to you.

Thanks again for the site tour and please feel free to call or email to discuss.

Gunnar Emilsson, P.G., P.E., BCEE
